6. **Applied Science & Technology**

Applied Science & Technology Full Text, produced by the H.W. Wilson Company, is a bibliographic database that indexes and abstracts articles of at least one column in length. Full-text coverage for selected periodicals is also included.

*Coverage: 1997 till present.*

7. **Chemical Abstracts**

Chemical Abstracts covers technical & scientific information on Biochemistry, Physical, Inorganic & Analytical chemistry, Applied chemistry & Chemical engineering and Organic chemistry. References are in the form of journals, patents, patents, technical reports, conference proceedings, etc.

*Coverage: 2000 till present.*

8. **ISI Web of Knowledge**

Provides access to essential information for all levels of academic, corporate, and government research. It offers a comprehensive, fully integrated platform that empowers researchers and accelerates discovery.

9. **Dissertation Abstracts**

Dissertation Abstracts database searched to find the dissertations and theses that meet your research needs with over 1.4 million entries and growing by 55,000 new dissertations and 7,000 new theses each year. It is an authoritative source for information on a variety of scholarly topics.

*Coverage: 1989 till present.*

10. **Food Science Technology Abstracts**

Food Science Technology Abstracts provides comprehensive coverage of literature in the areas related to food science and technology.

*Coverage: 1969 till present.*

11. **Petroleum Abstracts**

Petroleum Abstracts features bibliographic citations from the worldwide literature on upstream petroleum operations plus relevant patent information. It is a guide to papers, journal articles, conference proceedings, government reports, books, and patent filings around the world.

*Coverage: 1980 till present.*

12. **ACM Digital Library**

A full-text collection of every article from various ACM publications like Journals, Magazines, Transactions, Proceedings, Newsletters etc.

“To provide access to information in all formats to support teaching, learning and research functions of the University and local community.”
The Databases can be accessed from any PC in Kuwait University Khaldiya Campus through library administration homepage.

1. **EI Compendex**
   
   Provides abstracts for worldwide engineering and technical literature. It encompasses all engineering disciplines, as well as related fields in science and management.

   The records in the databases are drawn from over 2,600 published journals, conference proceedings, individual conference papers, technical reports, monographs and other materials.

   The database currently contains over 2 millions records and is considered as one of the foremost interdisciplinary engineering databases in the world. **Coverage: 1985 till present.**

2. **ICONDA**

   This international construction database provides bibliographic references with abstracts to articles published worldwide in scientific journals, books, conference proceedings, reports, theses and other non-conventional literature covering construction and related topics.

   ICONDA is endorsed by the International Council for Building Research, Studies and Documentation (CIB) and the International Union of Building Centers, information is contributed to the database by professional organizations in 15 countries. Sources include various national and international information and documentation centers as well as research institutes. New sources are continually added.

   One recent addition is the construction index from Architext. The construction index adds an annotated index of 45 U.S. construction industry.

   The database contains well over 300,000 records from over 800 periodicals worldwide. **Coverage: 1976 till present.**

3. **NTIS**

   Provides information about U.S. government-sponsored research and development projects. Compiled by the National Technical Information Services of the U.S. Department of Commerce. NTIS includes abstracts of unclassified, publicly available reports and analysis from 300 government agencies (including NASA, DOD, DOE, HVD and EPA).

   Hundreds of subjects are covered including administration and management, agriculture and food, behavior and society, building, business and economics, chemistry, civil engineering, energy, health planning, library and information science, materials science, medicine and biology, military science, transportation and much more.

   Reference numbers are supplied for each abstract to facilitate retrieval of the full report from the appropriate agency. **Coverage: 1980 till present.**

4. **Architecture Publications Index (API)**

   This CD-ROM has been designed to give quick, easy access to the index of the British Architectural Library at the Royal Institute of British Architects.

   It allows searches in a major collection of international information about architecture of every style and period. It is the only quarterly database available on CD-ROM which offers comprehensive coverage of all aspects of architecture, both technical and aesthetic, current and historical. **Coverage: 1978 till present.**

5. **Pollution Abstracts**

   This database provides fast access to the environmental information necessary to resolve day-to-day problems, ensure ongoing compliance, and handle emergency situations more effectively. Pollution Abstracts combines information on scientific research and government policies in a single resource. Topics of growing concern are extensively covered from the standpoints of atmosphere, emissions, mathematical models, effects on people and animals, and environmental action in response to global pollution issues. To ensure comprehensive coverage, material from conference proceedings and hard-to-find documents has been summarized along with information from primary journals in the field. **Coverage: 1981 till present.**
